PROFESSIONAL SUMMARY

WordPress Full-Stack Developer with 2+ years of experience building custom themes, plugins, WooCommerce stores, and LMS solutions. Proficient in PHP, JavaScript, Advanced Custom Fields (ACF), Custom Post Types, Shortcodes, and REST APIs. Hands-on experience with LearnPress, WooCommerce, Elementor, and basic knowledge of Shopify and Laravel. Background in Java full-stack development with exposure to Spring Boot and J2EE. Passionate about delivering responsive, ATS-optimized, and maintainable web solutions.

PROFESSIONAL EXPERIENCE

WordPress Developer | Crystaltech Services Private Limited

Oct 2024 – Present

- Developed and maintained WordPress websites from scratch using custom theme development with HTML, CSS, JavaScript, and PHP.
- Built and customized WordPress themes by converting Figma/design files into pixel-perfect, fully functional themes.
- Created Custom Post Types (CPT), custom taxonomies, and Shortcodes to extend WordPress core functionality.
- Developed custom WordPress plugins to add new features and extend platform capabilities as per project requirements.
- Utilized Advanced Custom Fields (ACF) including repeater fields, flexible content layouts, and custom field groups for dynamic content management.
- Developed WooCommerce-based e-commerce solutions with customized product pages, cart flows, checkout, and shop archive templates.
- Implemented LearnPress LMS functionality with custom course pages, curriculum management, and overriding core LearnPress templates and hooks.
- Built forum functionality and custom pagination systems using WordPress hooks, filters, and WP_Query.
- Used Elementor page builder for rapid front-end development with custom widget and section styling.
- Managed project codebases using Git and GitHub; collaborated with team on feature development and bug fixes.

Java Full Stack Intern | Webearn Solution Pvt Ltd

Jan 2024 – Sep 2024

- Gained professional experience specializing in Java technologies and enterprise application development.
- Developed software solutions using J2EE including server-side programming with Servlets and JSP.
- Worked with Spring, Spring MVC, Spring Boot, Hibernate, and JPA for backend development.
- Built maintainable codebases using OOP concepts, Multithreading, and Java Collections Framework.

Web Developer Intern | 1Stop Company

Mar 2022 – Oct 2022

- Contributed to the development of a Job Portal website using HTML, CSS, JavaScript, and Bootstrap.
- Managed back-end logic and database operations with PHP and MySQL.

PROJECTS

The MetaByte – Company Website (WordPress + Elementor) — <https://themetabyte.com>

- Designed and developed the complete company website for The MetaByte, a web agency serving 1,000+ active clients across 15 countries.
- Built a fully custom WordPress theme from scratch using Elementor, converting design concepts into a pixel-perfect, high-performance website.
- Implemented a dynamic Portfolio section showcasing client projects with custom post types and ACF-powered content management.
- Integrated animated image marquees, smooth scroll effects, and interactive UI elements using custom JavaScript and CSS.
- Optimized the site for SEO, page speed, and cross-device responsiveness to reflect the agency's professional brand identity.
- Deployed contact and inquiry features with custom forms and integrated phone/email CTAs for lead generation.

Technologies: WordPress, Elementor, Custom Theme Development, ACF, Custom Post Types, HTML, CSS, JavaScript, PHP, MySQL, SEO

Radiology Center at Harding – Medical Imaging Website (WordPress + Elementor) — <https://devshowcase.io>

- Developed a professional medical imaging website for a radiology center serving Morris County, NJ, offering services like MRI, CT Scans, 3D Mammography, and Whole-Body MRI.
- Built a fully custom WordPress theme using Elementor with multi-page structure including service pages, appointment booking, and patient information sections.
- Implemented a custom appointment booking flow and contact forms integrated with the center's scheduling system.
- Designed mobile-responsive layouts with accessibility considerations for a diverse patient audience.
- Integrated Google Maps, social media links, and structured content for local SEO optimization.

Technologies: WordPress, Elementor, Custom Theme, HTML, CSS, JavaScript, PHP, ACF, MySQL, SEO

Cuisine Course – LMS Website (LearnPress + Custom Theme) — <https://tcdwp.devshowcase.io/courses/cuisine-course>

- Designed the complete website layout from scratch and converted the design into a custom WordPress theme.
- Dynamically integrated all site content using PHP, WordPress template hierarchy, and custom template tags.
- Overrode LearnPress core templates and hooks to implement fully custom course pages, curriculum sections, and enrollment flow.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, LearnPress, ACF, Custom Post Types, MySQL

SSV – Dynamic WordPress Website with ACF & Pagination — <https://ssv.devshowcase.io>

- Built a complete custom WordPress theme after designing all pages from scratch.
- Used ACF to manage all dynamic content including custom post types, flexible content layouts, and repeater fields.
- Implemented custom pagination for archive pages and post listings using WordPress query functions and shortcodes.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, ACF, Custom Post Types, Shortcodes, MySQL

Mainsofa – E-Commerce Website (Elementor + WooCommerce) — <https://mainsofa.dk>

- Designed and developed a complete furniture e-commerce store for a Denmark-based client using Elementor and WooCommerce.
- Customized WooCommerce templates for product pages, cart, checkout, and shop archive pages.
- Added custom CSS and JavaScript for enhanced UI/UX, animations, and interactive product displays.

Technologies: WordPress, Elementor, WooCommerce, HTML, CSS, JavaScript, Custom PHP, Shortcodes

Online Exam Paper Generation System

- Designed and implemented a responsive UI for an exam paper generation system.
- Utilized Java Servlets for server-side logic and JSP for dynamic view rendering.

Technologies: HTML, CSS, JavaScript, Servlet, JSP, MySQL

Job Portal Website

- Developed a responsive job portal allowing users to upload resumes and search for job listings.

Technologies: HTML, CSS, Bootstrap, PHP, MySQL
